Air Contaminants, Ventilation, and Industrial Hygiene Economics: The Practitioner's Toolbox and Desktop Handbook Roger Lee Wabeke

There is nothing more devastating to baseless opinions than good numbers. **Air Contaminants, Ventilation, and Industrial Hygiene Economics: The Practitioner's Toolbox and Desktop Handbook** helps you obtain "good numbers" on your quest to squash shabby opinions with sound advice. It details real-world applications of good numbers to foster improvements in industrial hygiene, preventing inhalation toxicity and promoting better environmental air quality.

Divided into four parts, the book includes:

- Tips on preparing for the board certification examinations for Certified Industrial Hygienist (CIH), Certified Safety Professional (CSP), Certified Hazardous Materials Manager (CHMM), and Diplomate of the American Board of Toxicology (DABT)
- 726 solved problems in industrial hygiene, ventilation, occupational-environmental toxicology, occupational health risk management, and chemical safety engineering
- 154 economic persuasion techniques based on actual case studies to help feather one's career bed and assist installation of industrial hygiene control methods
- Tips and guiding principles for professional career development

This book provides industrial hygienists with a reference containing the equations, conversions, and formulas they encounter in their day-to-day duties. A study aid to those taking the certification exams (CIH, CSP, CHMM, and DABT), it also includes business economic case studies demonstrating how to preserve your clients' financial resources, promote industrial hygiene, foster worksite safety, learn the financial ropes of business economics, and help control your clients' potential adverse environmental impact and, in so doing, greatly enhance career progress.
