El jardín de la metrópoli constituye un nuevo modelo de espacio libre para la ciudad dispersa que puede dar lugar a un nuevo estrato de la realidad metropolitana: un nuevo espacio libre, reflejo de un espíritu que garantice la sostenibilidad sin renunciar a su formalización desde la modernidad. Este libro trata de establecer los principios de ese nuevo espacio libre a través del análisis de varios modelos históricos y de algunos ejemplos contemporáneos: desde jardines o parques hasta sistemas de espacio público e híbridos urbanos. También se pretende aprender de este nuevo espíritu mediante la recopilación de materiales procedentes de diversas disciplinas la agricultura, la ecología, el arte y la arquitectura, que no son presentadas desde su especificidad, sino que se interpretan desde la lógica de la arquitectura del paisaje. A partir de tales principios y elementos, finalmente, el autor define un nuevo estrato urbano, producto de la integración de todos los espacios libres metropolitanos desde los drenajes del territorio a los bosques de la metrópoli o desde las agriculturas urbanas hasta los jardines de asignación y las infraestructuras verdes con una actitud que puede persistir en las pequeñas acciones individuales o en todas aquellas intervenciones que, sin resolver la globalidad, pueden ser reflejo de su esencia.
