How to Cool the Planet: Geoengineering and the Audacious Quest to Fix Earth's Climate Jeff Goodell

Right now, a group of scientists is working on ways to minimize the catastrophic impact of global warming. But they're not designing hybrids or fuel cells or wind turbines. They're trying to lower the temperature of the entire planet. And they're doing it with huge contraptions that suck CO₂ from the air, machines that brighten clouds and deflect sunlight away from the earth, even artificial volcanoes that spray heat-reflecting particles into the atmosphere.

This is the radical and controversial world of geoengineering, which only five years ago was considered to be "fringe." But as Jeff Goodell points out, the economic crisis, combined with global political realities, is making these ideas look sane, even inspired.

Goodell himself started out as a skeptic, concerned about tinkering with the planet's thermostat. We can't even predict next week's weather, so how are we going to change the temperature of whole regions? What if a wealthy entrepreneur shoots particles into the stratosphere on his own? Who gets blamed if something goes terribly wrong? And perhaps most disturbing, what about wars waged with climate control as the primary weapon? There are certainly risks, but Goodell believes the alternatives could be worse. In the end, he persuades us that geoengineering may just be our last best hope—a Plan B for the environment. His compelling tale of scientific hubris and technical daring is sure to jump-start the next big debate about the future of life on earth.

From reader reviews:

Michael Battle:

Have you spare time for a day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a stroll, shopping, or went to often the Mall. How about open or read a book eligible How to Cool the Planet: Geoengineering and the Audacious Quest to Fix Earth's Climate? Maybe it is to be best activity for you. You recognize beside you can spend your time with your favorite's book, you can wiser than before. Do you agree with the opinion or you have different opinion?

Edward Yung:

Information is provisions for folks to get better life, information these days can get by anyone with everywhere. The information can be a information or any news even an issue. What people must be consider when those information which is in the former life are challenging to be find than now's taking seriously which one is suitable to believe or which one the particular resource are convinced. If you receive the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen inside you if you take How to Cool the Planet: Geoengineering and the Audacious Quest to Fix Earth's Climate as the daily resource information.

Rebecca Muldoon:

The book How to Cool the Planet: Geoengineering and the Audacious Quest to Fix Earth's Climate has a lot associated with on it. So when you make sure to read this book you can get a lot of gain. The book was written by the very famous author. Tom makes some research prior to write this book. This book very easy to read you can get the point easily after scanning this book.

Andrew Taylor:

That e-book can make you to feel relax. That book How to Cool the Planet: Geoengineering and the Audacious Quest to Fix Earth's Climate was multi-colored and of course has pictures on there. As we know that book How to Cool the Planet: Geoengineering and the Audacious Quest to Fix Earth's Climate has many kinds or variety. Start from kids until teenagers. For example Naruto or Investigator Conan you can read and think that you are the character on there. So , not at all of book are usually make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading this.
