## NASA Skylab News Reference NASA

America's first space station, known as Skylab, proved the concept of a zero-g laboratory and orbiting observatory, and paved the way for today's International Space Station. Launched on May 14, 1973, the station nearly didn't make it into operation when an aluminum micro-meteoroid shield tore loose during lift-off, taking one of two solar power arrays with it. While Skylab made orbit, the station was left underpowered and its interior overheated. NASA quickly came up with a salvage plan and after a ten-day delay the crew of the SL-2 mission rendezvoused with the station. Contingency repairs, including the installation of a parasol-like sun shield and deployment of the remaining solar array, succeeded and Skylab functioned more or less as intended for the duration of its mission. During that time two additional crews designated SL-3 and SL-4 visited the station and conducted a wide range of experiments. The SL-4 crew departed the station on February 8, 1974 after spending 83 days in orbit. During that time they performed four EVAs, shot 75,000 images of the sun, filmed Comet Kohoutek and traveled over 34.5 million miles. Despite this terrific success, Skylab would never be occupied again. The end of the Saturn V era and delays with the Space Shuttle program resulted in the station's abandonment, and it burned up in the Earth's atmosphere in 1979. Originally created by NASA in 1973 to inform the press corps about America's first space station, this Skylab News Reference contains chapters detailing the station's hardware and systems. It also provides detailed information concerning flight operations, launch facilities, experiments on board, crew training, contractors and project management. Also included are official press releases for the SL-1 and SL-2, SL-3 and SL-4 missions.

### **From reader reviews:**

#### **Richard Tipton:**

This NASA Skylab News Reference tend to be reliable for you who want to certainly be a successful person, why. The key reason why of this NASA Skylab News Reference can be one of the great books you must have is actually giving you more than just simple looking at food but feed you with information that perhaps will shock your previous knowledge. This book is handy, you can bring it everywhere you go and whenever your conditions in the e-book and printed types. Beside that this NASA Skylab News Reference giving you an enormous of experience for instance rich vocabulary, giving you demo of critical thinking that we realize it useful in your day action. So , let's have it appreciate reading.

#### **Joanna Weekley:**

Are you kind of hectic person, only have 10 or even 15 minute in your moment to upgrading your mind talent or thinking skill also analytical thinking? Then you are experiencing problem with the book when compared with can satisfy your limited time to read it because pretty much everything time you only find book that need more time to be go through. NASA Skylab News Reference can be your answer mainly because it can be read by a person who have those short free time problems.

#### **Chris Boos:**

The book untitled NASA Skylab News Reference contain a lot of information on the idea. The writer explains the woman idea with easy way. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read this. The book was authored by famous author. The author brings you in the new period of literary works. It is easy to read this book because you can continue reading your smart phone, or program, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can start their official web-site along with order it. Have a nice learn.

#### **Claire Davis:**

Book is one of source of know-how. We can add our expertise from it. Not only for students but also native or citizen want book to know the change information of year in order to year. As we know those guides have many advantages. Beside we all add our knowledge, could also bring us to around the world. By book NASA Skylab News Reference we can get more advantage. Don't someone to be creative people? To get creative person must choose to read a book. Just choose the best book that acceptable with your aim. Don't be doubt to change your life with that book NASA Skylab News Reference. You can more pleasing than now.
