An Introduction to Pharmaceutical Sciences: Production, Chemistry, Techniques and Technology (Woodhead Publishing Series in Biomedicine) Jiben Roy

This textbook is written as a unified approach to various topics, ranging from drug discovery to manufacturing, techniques and technology, regulation and marketing. The key theme of the book is pharmaceuticals - what every student of pharmaceutical sciences should know: from the active pharmaceutical ingredients to the preparation of various dosage forms along with the relevant chemistry, this book makes pharmaceuticals relevant to undergraduate students of pharmacy and pharmaceutical sciences.

This book explains how a particular drug was discovered and then converted from lab-scale to manufacturing scale, to the market. It explains the motivation for drug discovery, the reaction chemistry involved, experimental difficulties, various dosage forms and the reasoning behind them, mechanism of action, quality assurance and role of regulatory agencies. After having a course based on this book, the student will be able to understand: 1) the career prospects in the pharmaceutical industry, 2) the need for interdisciplinary teamwork in science, 3) the techniques and technology involved in making pharmaceuticals starting from bulk drugs, and 4) different dosage forms and critical factors in the development of pharmaceutical formulations in relation to the principles of chemistry.

A few blockbuster drugs including atorvastatin, sildanefil, ranitidine, ciprofloxacin, amoxicillin, and the longest serving drugs such as aspirin and paracetamol are discussed in detail. Finally, the book also covers the important current pharmaceutical issues like quality control, safety, counterfeiting and abuse of drugs, and future prospects for pharmaceutical industry.

- Unified approach explaining drug discovery, bulk drug manufacturing, formulation of dosage forms, with pharmacological and therapeutic actions
- Manufacturing processes of representative active pharmaceutical ingredients and their chemistry plus formulation of dosage forms presented in this book are based on actual industrial processes
- Covers many aspects relevant to students of the pharmaceutical sciences or newly employed pharmaceutical researchers/employees. It contains summary information about regulatory agencies of different countries

From reader reviews:

Enrique McLean:

What do you consider book? It is just for students as they are still students or the item for all people in the world, what the best subject for that? Just simply you can be answered for that issue above. Every person has various personality and hobby per other. Don't to be forced someone or something that they don't would like do that. You must know how great along with important the book An Introduction to Pharmaceutical Sciences: Production, Chemistry, Techniques and Technology (Woodhead Publishing Series in Biomedicine). All type of book can you see on many options. You can look for the internet methods or other social media.

David Binkley:

Now a day people that Living in the era just where everything reachable by match the internet and the resources inside can be true or not require people to be aware of each information they get. How people have to be smart in getting any information nowadays? Of course the correct answer is reading a book. Examining a book can help folks out of this uncertainty Information specially this An Introduction to Pharmaceutical Sciences: Production, Chemistry, Techniques and Technology (Woodhead Publishing Series in Biomedicine) book as this book offers you rich facts and knowledge. Of course the info in this book hundred per cent guarantees there is no doubt in it everybody knows.

Mary Tiller:

What is your hobby? Have you heard in which question when you got learners? We believe that that query was given by teacher to the students. Many kinds of hobby, Every individual has different hobby. And you know that little person including reading or as studying become their hobby. You have to know that reading is very important in addition to book as to be the matter. Book is important thing to add you knowledge, except your teacher or lecturer. You will find good news or update regarding something by book. Numerous books that can you decide to try be your object. One of them are these claims An Introduction to Pharmaceutical Sciences: Production, Chemistry, Techniques and Technology (Woodhead Publishing Series in Biomedicine).

Maria Antoine:

Reading a publication make you to get more knowledge from this. You can take knowledge and information from your book. Book is written or printed or illustrated from each source that will filled update of news. In this particular modern era like currently, many ways to get information are available for an individual. From media social such as newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to spread out your book? Or just trying to find the An Introduction to Pharmaceutical Sciences: Production, Chemistry, Techniques and Technology (Woodhead Publishing Series in Biomedicine) when you needed it?
