Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics)

Daniel Bump, Solomon Friedberg, Dorian Goldfeld

Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics)

Daniel Bump, Solomon Friedberg, Dorian Goldfeld

Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics) Daniel Bump, Solomon Friedberg, Dorian Goldfeld
Multiple Dirichlet Series, L-functions and Automorphic Forms gives the latest advances in the rapidly developing subject of Multiple Dirichlet Series, an area with origins in the theory of automorphic forms that exhibits surprising and deep connections to crystal graphs and mathematical physics. As such, it represents a new way in which areas including number theory, combinatorics, statistical mechanics, and quantum groups are seen to fit together. The volume also includes papers on automorphic forms and L-functions and related number-theoretic topics. This volume will be a valuable resource for graduate students and researchers in number theory, combinatorics, representation theory, mathematical physics, and special functions.Contributors:
J. Beineke, B. Brubaker, D. Bump, G. Chinta, G. Cornelissen, C.A. Diaconu, S. Frechette, S. Friedberg, P. Garrett, D. Goldfeld, P.E. Gunnells, B. Heim, J. Hundley, D. Ivanov, Y. Komori, A.V. Kontorovich, O. Lorscheid, K. Matsumoto, P.J. McNamara, S.J. Patterson, M. Suzuki, H. Tsumura.

From reader reviews:

Martha Albarado:

Have you spare time for any day? What do you do when you have a lot more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the Mall. How about open or perhaps read a book called Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics)? Maybe it is to get best activity for you. You realize beside you can spend your time with your favorite's book, you can smarter than before. Do you agree with their opinion or you have additional opinion?

Maurice Neely:

The book Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics) can give more knowledge and information about everything you want. Exactly why must we leave the great thing like a book Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics)? Several of you have a different opinion about book. But one aim in which book can give many facts for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or facts that you take for that, you may give for each other; you may share all of these. Book Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics) has simple shape however you know: it has great and massive function for you. You can appearance the enormous world by wide open and read a reserve. So it is very wonderful.

Sheila Robinson:

This Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics) is great book for you because the content and that is full of information for you who have always deal with world and get to make decision every minute. This kind of book reveal it data accurately using great manage word or we can say no rambling sentences inside it. So if you are read that hurriedly you can have whole details in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with beautiful delivering sentences. Having Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in Mathematics) in your hand like obtaining the world in your arm, information in it is not ridiculous 1. We can say that no guide that offer you world within ten or fifteen minute right but this guide already do that. So , this is good reading book. Hi Mr. and Mrs. stressful do you still doubt this?

Juanita Stoneman:

In this period of time globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of recommendations to get information example: internet, newspapers, book, and soon. You can see that now, a lot of publisher which print many kinds of book. The actual book that recommended to you is Multiple Dirichlet Series, L-functions and Automorphic Forms: 300 (Progress in

Mathematics) this e-book consist a lot of the information with the condition of this world now. This particular book was represented so why is the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. The actual writer made some investigation when he makes this book. That's why this book appropriate all of you.
