Running Linux Matthias Kalle Dalheimer, Matt Welsh

You may be contemplating your first Linux installation. Or you may have been using Linux for years and need to know more about adding a network printer or setting up an FTP server. *Running Linux*, now in its fifth edition, is the book you'll want on hand in either case. Widely recognized in the Linux community as the ultimate getting-started and problem-solving book, it answers the questions and tackles the configuration issues that frequently plague users, but are seldom addressed in other books.

This fifth edition of *Running Linux* is greatly expanded, reflecting the maturity of the operating system and the teeming wealth of software available for it. Hot consumer topics suchas audio and video playback applications, groupware functionality, and spam filtering are covered, along with the basics in configuration and management that always have made the book popular.

Running Linux covers basic communications such as mail, web surfing, and instant messaging, but also delves into the subtleties of network configuration--including dial-up, ADSL, and cable modems--in case you need to set up your network manually. The book canmake you proficient on office suites and personal productivity applications--and also tells you what programming tools are available if you're interested in contributing to these applications.

Other new topics in the fifth edition include encrypted email and filesystems, advanced shell techniques, and remote login applications. Classic discussions on booting, package management, kernel recompilation, and X configuration have also been updated.

The authors of *Running Linux* have anticipated problem areas, selected stable and popular solutions, and provided clear instructions to ensure that you'll have a satisfying experience using Linux. The discussion is direct and complete enough to guide novice users, while still providing the additional information experienced users will need to progress in their mastery of Linux.

Whether you're using Linux on a home workstation or maintaining a network server, *Running Linux* will provide expert advice just when you need it.

From reader reviews:

Sharon Novick:

Book is to be different for every grade. Book for children until eventually adult are different content. We all know that that book is very important usually. The book Running Linux seemed to be making you to know about other expertise and of course you can take more information. It is very advantages for you. The reserve Running Linux is not only giving you considerably more new information but also to be your friend when you sense bored. You can spend your spend time to read your book. Try to make relationship while using book Running Linux. You never truly feel lose out for everything when you read some books.

Nick McAllister:

Information is provisions for people to get better life, information currently can get by anyone with everywhere. The information can be a expertise or any news even a huge concern. What people must be consider when those information which is from the former life are hard to be find than now is taking seriously which one is acceptable to believe or which one the actual resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will see huge disadvantage for you. All those possibilities will not happen within you if you take Running Linux as your daily resource information.

Gene Baker:

Spent a free time to be fun activity to perform! A lot of people spent their down time with their family, or their friends. Usually they undertaking activity like watching television, planning to beach, or picnic inside the park. They actually doing same every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could possibly be reading a book is usually option to fill your totally free time/ holiday. The first thing that you'll ask may be what kinds of book that you should read. If you want to attempt look for book, may be the reserve untitled Running Linux can be very good book to read. May be it can be best activity to you.

Carol Anthony:

Are you kind of busy person, only have 10 or maybe 15 minute in your time to upgrading your mind skill or thinking skill also analytical thinking? Then you are receiving problem with the book compared to can satisfy your short time to read it because this all time you only find book that need more time to be go through. Running Linux can be your answer as it can be read by a person who have those short extra time problems.
