Organometallics in Synthesis: Fourth Manual

Bruce H. Lipshutz

Organometallics in Synthesis: Fourth Manual Bruce H. Lipshutz

Provides detailed procedures and useful hints on organometallic reactions of Cu, Rh, Ni, and Au

With contributions from leading organic chemists who specialize in the use of organometallics in organic synthesis, this acclaimed *Manual* offers an especially valuable resource for all synthetic chemists, providing a practical reference for conducting transition metal-mediated synthetic reactions. This *Fourth Manual* is divided into four chapters:

- Chapter I: Organocopper Chemistry
- Chapter II: Organorhodium Chemistry
- Chapter III: Organonickel Chemistry
- Chapter IV: Organogold Chemistry

Each of these newly written chapters features detailed, practical examples from the literature that guide readers through the preparation of organometallic reagents and their applications in organic synthesis. Procedures are presented in the *Manual's* acclaimed step-by-step recipe format, enabling both novices and experienced synthetic chemists to perform all the reactions with ease. In addition, the *Manual* features:

- Extensive background information on the organometallic chemistry of Cu, Rh, Ni, and Au
- References to the primary literature facilitating further investigation of all the reactions covered in the *Manual*
- Mechanistic considerations to help readers better understand how the desired products are formed
- Future research opportunities for each organometallic class

Organometallics in Synthesis provides extensive and detailed information enabling synthetic chemists to readily assess the applicability of a synthetic method to a given need, and then to perform the reaction with confidence. The *Manual* covers both established organometallic procedures along with the most recently published protocols.

Industrial processes are increasingly relying on organometallic chemistry. In this *Manual*, readers will find applications to such fields as natural products total synthesis, pharmaceuticals, fine chemicals, biotechnology, agricultural science, polymers, and materials science.

From reader reviews:

Lizabeth Melgar:

Do you have favorite book? When you have, what is your favorite's book? Guide is very important thing for us to be aware of everything in the world. Each publication has different aim or goal; it means that publication has different type. Some people feel enjoy to spend their a chance to read a book. They can be reading whatever they have because their hobby is definitely reading a book. Why not the person who don't like looking at a book? Sometime, person feel need book whenever they found difficult problem or maybe exercise. Well, probably you will require this Organometallics in Synthesis: Fourth Manual.

Sharon Hafer:

What do you regarding book? It is not important together with you? Or just adding material when you require something to explain what you problem? How about your spare time? Or are you busy particular person? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question mainly because just their can do that will. It said that about reserve. Book is familiar on every person. Yes, it is appropriate. Because start from on pre-school until university need this specific Organometallics in Synthesis: Fourth Manual to read.

Leonie Blazek:

Typically the book Organometallics in Synthesis: Fourth Manual has a lot info on it. So when you make sure to read this book you can get a lot of gain. The book was published by the very famous author. The author makes some research ahead of write this book. This book very easy to read you will get the point easily after looking over this book.

James Martin:

As a college student exactly feel bored to reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just very little students that has reading's heart or real their interest. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring in addition to can't see colorful pics on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore this Organometallics in Synthesis: Fourth Manual can make you feel more interested to read.
