Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) Rob Roggema

This book shows that the problem of climate adaptation, which is described in social planning terms as ‘wicked,’ is at odds with the contemporary practice of spatial planning. The author proposes a new adjusted framework which is more adaptable to unpredictable, wicked, dynamic and non-linear processes. The inspiration for this new method is the behaviour of swarms: bees, ants, birds and fish are capable of self-organization, which enables the system to become less vulnerable to sudden environmental changes. The framework proposed in Swarm Planning consists of these four elements: Two levels of complexity, the first being the whole system and the second its individual components. Each of these has different attributes for adapting to change. Five layers, consisting of networks, focal points, unplanned space, natural resources and emerging occupation patterns. Each layer has its own spatial dynamic, and each is connected to a spatial scale. Non-linear processes, which emerge in different parts of the framework and include emerging patterns, connectedness and tipping points among others. Two planning processes; the first, ‘from small to large’ works upward from the slowest changing elements to more rapidly-changing ones. The second, ‘on the list of partners’ addresses each layer from networks through emerging occupation patterns. Swarm Planning applies this framework to a series of pilot studies, and appraises its performance using criteria for an adaptive landscape. The results show that the use of the Swarm Planning Framework reduces the vulnerability of landscapes as well as the impact of climate hazards and disasters, improves response to unexpected hazards and contains adaptation strategies.

“This book is a must for planners in government and the private sector as it outlines the concept, strategies and techniques for swarm planning. It is also an important guide for policymakers looking to engage communities in a dialogue about the adaptation planning process.”

Professor John Martin, La Trobe University

“The ultimate value of the book lies in encouraging the planning community to consider options that go far beyond those offered by business-as-usual planning methodologies developed for a set of operating conditions that are fast becoming obsolete. As such it makes an important and much needed contribution to the field.”

Assistant Professor Dr. Chrisna du Plessis, University of Pretoria

From reader reviews:

Arthur Walker:

Why don't make it to be your habit? Right now, try to ready your time to do the important work, like looking for your favorite e-book and reading a e-book. Beside you can solve your condition; you can add your knowledge by the e-book entitled Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses). Try to stumble through book Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) as your friend. It means that it can for being your friend when you feel alone and beside that course make you smarter than in the past. Yeah, it is very fortunated for you personally. The book makes you more confidence because you can know every little thing by the book. So , let's make new experience as well as knowledge with this book.

Gary Flint:

As people who live in the modest era should be revise about what going on or facts even knowledge to make these individuals keep up with the era that is certainly always change and move forward. Some of you maybe may update themselves by looking at books. It is a good choice for you personally but the problems coming to an individual is you don't know what one you should start with. This Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Kathleen Knight:

The book untitled Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) is the guide that recommended to you to read. You can see the quality of the book content that will be shown to you actually. The language that writer use to explained their ideas are easily to understand. The author was did a lot of research when write the book, therefore the information that they share to you is absolutely accurate. You also could get the e-book of Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses) from the publisher to make you a lot more enjoy free time.

Marjorie Calhoun:

Playing with family inside a park, coming to see the sea world or hanging out with buddies is thing that usually you might have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you already been ride on and with addition of knowledge. Even you love Swarm Planning: The Development of a Planning Methodology to Deal with Climate Adaptation (Springer Theses), you may enjoy both. It is fine combination right, you still would like to miss it? What kind of hang type is it? Oh seriously its mind hangout guys. What? Still don't have it, oh come on its identified as reading friends.
