Information Retrieval Architecture and Algorithms

Gerald Kowalski

Information Retrieval Architecture and Algorithms Gerald Kowalski

This text presents a theoretical and practical examination of the latest developments in Information Retrieval and their application to existing systems. By starting with a functional discussion of what is needed for an information system, the reader can grasp the scope of information retrieval problems and discover the tools to resolve them. The book takes a system approach to explore every functional processing step in a system from ingest of an item to be indexed to displaying results, showing how implementation decisions add to the information retrieval goal, and thus providing the user with the needed outcome, while minimizing their resources to obtain those results.

The text stresses the current migration of information retrieval from just textual to multimedia, expounding upon multimedia search, retrieval and display, as well as classic and new textual techniques. It also introduces developments in hardware, and more importantly, search architectures, such as those introduced by Google, in order to approach scalability issues.

About this textbook:

- A first course text for advanced level courses, providing a survey of information retrieval system theory and architecture, complete with challenging exercises
- Approaches information retrieval from a practical systems view in order for the reader to grasp both scope and solutions
- Features what is achievable using existing technologies and investigates what deficiencies warrant additional exploration

From reader reviews:

Larry Brackett:

Often the book Information Retrieval Architecture and Algorithms will bring that you the new experience of reading some sort of book. The author style to spell out the idea is very unique. Should you try to find new book to learn, this book very acceptable to you. The book Information Retrieval Architecture and Algorithms is much recommended to you you just read. You can also get the e-book from your official web site, so you can more easily to read the book.

Courtney O'Donnell:

The e-book untitled Information Retrieval Architecture and Algorithms is the reserve that recommended to you to learn. You can see the quality of the reserve content that will be shown to a person. The language that creator use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, therefore the information that they share for your requirements is absolutely accurate. You also will get the e-book of Information Retrieval Architecture and Algorithms from the publisher to make you considerably more enjoy free time.

Jennifer Ruiz:

E-book is one of source of understanding. We can add our understanding from it. Not only for students but native or citizen need book to know the revise information of year to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can also bring us to around the world. From the book Information Retrieval Architecture and Algorithms we can have more advantage. Don't you to definitely be creative people? To become creative person must want to read a book. Simply choose the best book that suited with your aim. Don't be doubt to change your life with this book Information Retrieval Architecture and Algorithms. You can more inviting than now.

Wendy Clark:

Reading a book make you to get more knowledge from this. You can take knowledge and information from your book. Book is written or printed or highlighted from each source in which filled update of news. Within this modern era like currently, many ways to get information are available for an individual. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Isn't it time to spend your spare time to open your book? Or just trying to find the Information Retrieval Architecture and Algorithms when you essential it?
