PC and Electronics: Connecting Your PC to External Devices (Productivity Series) Data-Becker, Bernd Zoller

A must for technical hobbyists, this text teaches readers how to use a personal computer as a control device and shows them how to create simple circuits that connect a PC to external electronic devices, running them from the PC. It provides all the information needed to create the circuits and describes what can be accomplished with them. The CD-ROM contains the software needed for running these circuits, detailed circuit diagrams, executable files, and the source code for each circuit's software.
