Excerpt from The Mechanic's Companion: Or, the Elements and Practice of Carpentry, Joinery, Bricklaying, Masonry, Slating, Plastering, Painting, Smithing, and Turning

More than a century has elapsed since an ingenious and useful work on the Arts connected with Building was published under the title of Mechanical Exercises, by the celebrated Joseph Moxon: that it was both useful and popular the various editions testify, and at this time it is become scarce and rarely to be met with. I can be no disparagement to its ingenious author, to say that the progress of science, and the changes in matters of art have rendered the work obsolete and useless. It treated on Smithing, Joinery, Carpentry, Turning, Bricklaying, and Dialling.
