The universe is an ocean of mysteries and surprises. Why and from where we have come? What is our role and aim in this life? What is death and what happens after death? Who controls or regulate our actions? What are destiny and Karma principles? Is there anything as soul and rebirth? What is the origin and power of our thoughts? Saints, philosophers and scientists have all tried to answer these queries but no universally accepted views have emerged so far. In the last two centuries, great strides have been made in various fields of knowledge. But what is the use of this knowledge if it does not bring liberation from sufferings and peace of mind. Consciousness and universe are inter-woven. Time is a great cosmic force with four dimensional approach. Philosophy and religion are in depth study of man. To know the human beings is to know the universe and mind/ intellect play a great role in it. Sri Ramkrishna said, “A man attains everything when he discovers his true Self in himself.” One should strive to attain the state of sat-chit-anand in this very life. Astrology is a divine science which helps one understand himself better and answer various what, why, how and when in a systematic way.
