## Plan and implement fiber optic networks

Effectively design and deploy bandwidth-rich networks for major types of data traffic. Covering both short-reach and long-haul networks, *Planning Fiber Optic Networks* provides full details on all major fiber optic parameters and includes appropriate background theory and design calculations. You will find guidelines for optimizing SONET/SDH and Ethernet networks, setting up network topologies, minimizing signal loss and impairments, and using dark fiber. Real-world examples are included throughout this practical guide.

- Understand signal propagation in a single-mode fiber
- Plan an optical loss budget
- Maintain an acceptable optical signal-to-noise ratio (OSNR)
- Learn about the effects of chromatic dispersion (CD) and polarization mode dispersion (PMD)
- Expand fiber capacity using wavelength division multiplexing (WDM)
- Reduce fiber nonlinear impairments
- Perform fiber characterization to ensure optimal quality and performance
- Test Ethernet and SONET/SDH networks
- Plan point-to-point and ring fiber topologies
- Lease or purchase dark fiber

### **From reader reviews:**

#### **Nancy Hartsell:**

In this 21st millennium, people become competitive in most way. By being competitive now, people have do something to make these survives, being in the middle of the actual crowded place and notice through surrounding. One thing that oftentimes many people have underestimated it for a while is reading. Sure, by reading a publication your ability to survive improve then having chance to remain than other is high. For you who want to start reading any book, we give you this kind of Planning Fiber Optics Networks book as beginning and daily reading publication. Why, because this book is usually more than just a book.

#### **Carolyn Franklin:**

Often the book Planning Fiber Optics Networks has a lot of information on it. So when you read this book you can get a lot of help. The book was written by the very famous author. Tom makes some research prior to write this book. This specific book very easy to read you can obtain the point easily after scanning this book.

#### **Mary Peterson:**

Many people spending their period by playing outside with friends, fun activity having family or just watching TV all day every day. You can have new activity to invest your whole day by studying a book. Ugh, think reading a book can definitely hard because you have to use the book everywhere? It okay you can have the e-book, having everywhere you want in your Smartphone. Like Planning Fiber Optics Networks which is keeping the e-book version. So , try out this book? Let's see.

#### **Rachel Cady:**

What is your hobby? Have you heard that question when you got students? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. So you know that little person similar to reading or as reading become their hobby. You need to understand that reading is very important and book as to be the issue. Book is important thing to provide you knowledge, except your own teacher or lecturer. You get good news or update in relation to something by book. Amount types of books that can you choose to adopt be your object. One of them is this Planning Fiber Optics Networks.
