Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds

Edythe Weeks

It is the eve of outer space development, but few people are aware of this. In the absence of awareness, people cannot prepare for the opportunities that will arise; and so the vast wealth likely to flow to Earth from outer space will cause ever-greater inequality and instability in our already unequal and unstable world. This book is a call to educators to factor equality and diversity into the process of outer space development by creating a widespread movement to teach outer space development studies to all students, especially those who study social and behavioral sciences. In calling for this, I am also putting out a call to visionary thinkers to increase public awareness that outer space is already in the process of being developed. My objective is to provide a pedagogical approach aimed at mending the knowledge gap. If we fail in this objective, we are more likely than ever before to witness ever-widening gaps of social and financial inequality. The first question that will arise as we embark on this process, of course, will be: Why Outer Space Development? People often ask where the money will come from to develop outer space. Platinum-group metals such as iridium and osmium, and various other valuable untapped natural resources, have been discovered in abundant quantities and are likely to be mined by companies. The discovery of natural resources has sparked development projects in the past. These historical patterns of human behavior are occurring again today, as companies speed up the process of private spaceship development. A myriad of space laws and policies are already in place to support space commercialization. Recently, the 2010 NASA Authorization Act and various other laws and policies initiated by the U.S. government have placed on the agenda plans to build advanced space transportation systems; to privatize spacecraft development; to create commercial space habitats, space stations, and space settlements; to initiate commercial space mining; to investigate spacecraft trajectory optimization for landing on near-Earth asteroids; to engage in commercial spaceport construction and interstellar-interplanetary-international telecommunications; and to launch space exploration missions to near-Earth asteroids, the Moon, Mars, and Mars' moons. U.S. initiatives have in the past been mirrored by the international community, and we can expect to see similar patterns arising on a global scale - indeed, as this book will demonstrate, they already are. The global community is experiencing economic recession, natural disasters, lack of opportunity, employment anxiety, failing K-12 programs, widening inequality gaps, unprising, revolutions, revolts, unmet educational goals, and a general failure to uplift, inspire, and provide meaningful opportunities for significant portions of our population. In the United States of America, the wars in Iraq and Afghanistan failed to jumpstart the economy; the Dow Jones failed; Wall Street failed; millions of working people lost their houses to foreclosure; tent communities and homeless populations are on the increase; many people are experiencing depression, anxiety, career anxiety; we see alarming rates of people dropping out of high school and college; and there is a general lack of opportunities, along with high rates of job loss. People need something that will allow them to focus a new their talents, energies, abilities, and gifts, and use use this bleak climate as an opportunity for positive change. Outer space development is emerging as an answer to this state of crisis. The question is: To whom will the benefits accrue? Many strategic decisions have already been taken regarding space development of which the global general public is unaware. Once legal rights to space resources are granted, only those with the capital to take advantage of new laws and policies will be in a positio

From reader reviews:

Tom Moore:

Why don't make it to become your habit? Right now, try to prepare your time to do the important act, like looking for your favorite publication and reading a guide. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds. Try to stumble through book Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds as your good friend. It means that it can to get your friend when you sense alone and beside that of course make you smarter than ever before. Yeah, it is very fortunated for you personally. The book makes you far more confidence because you can know almost everything by the book. So , let us make new experience as well as knowledge with this book.

Gwen Dawes:

This Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds book is absolutely not ordinary book, you have after that it the world is in your hands. The benefit you get by reading this book is information inside this e-book incredible fresh, you will get data which is getting deeper you actually read a lot of information you will get. This particular Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds without we understand teach the one who reading it become critical in contemplating and analyzing. Don't become worry Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds can bring whenever you are and not make your tote space or bookshelves' turn out to be full because you can have it in the lovely laptop even cellphone. This Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds having very good arrangement in word along with layout, so you will not experience uninterested in reading.

Gary Ritchie:

The guide with title Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds has lot of information that you can understand it. You can get a lot of gain after read this book. That book exist new knowledge the information that exist in this book represented the condition of the world now. That is important to yo7u to know how the improvement of the world. This book will bring you throughout new era of the internationalization. You can read the e-book on your own smart phone, so you can read that anywhere you want.

Mark Adair:

As a college student exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some publication, they are complained. Just minor students that has reading's soul or real their interest. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading very seriously. Any students feel that looking at is not important, boring

along with can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this Outer Space Development, International Relations and Space Law: A Method for Elucidating Seeds can make you really feel more interested to read.
