## **Probability without Equations: Concepts for Clinicians** Bart K. Holland

Although few physicians, nurses, dentists and other health professionals perform laboratory test themselves, they need to be able to interpret their results and understand findings. This text offers an explanation of the necessary details in probability and statistics in a non-technical treatment. Although few physicians, nurses, dentists and other health professionals perform laboratory tests themselves, they need to be able to interpret the results and understand findings reported in medical literature. A general understanding of probability and statistics is essential for those needing to make daily decisions about the significance of research data, drug interaction precautions, or a patient's positive laboratory test for a rare disease. Written to address these needs, this volume offers an explanation of the subject whilst attempting to avoid overwhelming the reader with equations and footnotes. The author presents a non-technical treatment of intuitive concepts and presents examples from medical research and practice. In plain language, the book explains the topics that clinicians need to understand: analysis of variance; "p-values" and the "t-test"; hazard models; regression and correlations; and alpha and beta errors.

### **From reader reviews:**

#### **Corey Valenzuela:**

Do you certainly one of people who can't read enjoyable if the sentence chained inside straightway, hold on guys this particular aren't like that. This Probability without Equations: Concepts for Clinicians book is readable simply by you who hate the perfect word style. You will find the details here are arrange for enjoyable reading experience without leaving possibly decrease the knowledge that want to offer to you. The writer associated with Probability without Equations: Concepts for Clinicians content conveys prospect easily to understand by many people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking Probability without Equations: Concepts for Clinicians is not loveable to be your top list reading book?

#### **Abel Mulholland:**

Probability without Equations: Concepts for Clinicians can be one of your starter books that are good idea. Many of us recommend that straight away because this reserve has good vocabulary that may increase your knowledge in words, easy to understand, bit entertaining but still delivering the information. The author giving his/her effort to get every word into pleasure arrangement in writing Probability without Equations: Concepts for Clinicians however doesn't forget the main level, giving the reader the hottest and based confirm resource details that maybe you can be certainly one of it. This great information can certainly drawn you into completely new stage of crucial imagining.

#### **Roberto Fetter:**

Beside this kind of Probability without Equations: Concepts for Clinicians in your phone, it could possibly give you a way to get closer to the new knowledge or facts. The information and the knowledge you will got here is fresh through the oven so don't always be worry if you feel like an previous people live in narrow village. It is good thing to have Probability without Equations: Concepts for Clinicians because this book offers for you readable information. Do you at times have book but you would not get what it's all about. Oh come on, that would not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss it? Find this book and read it from right now!

#### **Frederick Cagle:**

That e-book can make you to feel relax. This specific book Probability without Equations: Concepts for Clinicians was vibrant and of course has pictures on the website. As we know that book Probability without Equations: Concepts for Clinicians has many kinds or type. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore not at all of book tend to be make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.
