**The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology)** Stephen P. Hubbell

Despite its supreme importance and the threat of its global crash, biodiversity remains poorly understood both empirically and theoretically. This ambitious book presents a new, general neutral theory to explain the origin, maintenance, and loss of biodiversity in a biogeographic context.

Until now biogeography (the study of the geographic distribution of species) and biodiversity (the study of species richness and relative species abundance) have had largely disjunct intellectual histories. In this book, Stephen Hubbell develops a formal mathematical theory that unifies these two fields. When a speciation process is incorporated into Robert H. MacArthur and Edward O. Wilson's now classical theory of island biogeography, the generalized theory predicts the existence of a universal, dimensionless biodiversity number. In the theory, this fundamental biodiversity number, together with the migration or dispersal rate, completely determines the steady-state distribution of species richness and relative species abundance on local to large geographic spatial scales and short-term to evolutionary time scales.

Although neutral, Hubbell's theory is nevertheless able to generate many nonobvious, testable, and remarkably accurate quantitative predictions about biodiversity and biogeography. In many ways Hubbell's theory is the ecological analog to the neutral theory of genetic drift in genetics. The unified neutral theory of biogeography and biodiversity should stimulate research in new theoretical and empirical directions by ecologists, evolutionary biologists, and biogeographers.

### **From reader reviews:**

#### **Gale Kizer:**

The publication with title The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) includes a lot of information that you can study it. You can get a lot of profit after read this book. This particular book exist new understanding the information that exist in this guide represented the condition of the world today. That is important to yo7u to learn how the improvement of the world. This book will bring you inside new era of the the positive effect. You can read the e-book on your own smart phone, so you can read that anywhere you want.

#### **Willie Blackburn:**

Reading can called brain hangout, why? Because while you are reading a book specially book entitled The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) your mind will drift away trough every dimension, wandering in every single aspect that maybe not known for but surely will end up your mind friends. Imaging each word written in a book then become one application form conclusion and explanation which maybe you never get previous to. The The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) giving you yet another experience more than blown away your thoughts but also giving you useful info for your better life in this particular era. So now let us teach you the relaxing pattern at this point is your body and mind will be pleased when you are finished reading through it, like winning a casino game. Do you want to try this extraordinary spending spare time activity?

#### **Sheryl Hicks:**

Within this era which is the greater man or woman or who has ability in doing something more are more special than other. Do you want to become one among it? It is just simple way to have that. What you must do is just spending your time little but quite enough to have a look at some books. Among the books in the top record in your reading list will be The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology). This book which can be qualified as The Hungry Hillside can get you closer in turning out to be precious person. By looking upward and review this publication you can get many advantages.

#### **Salvador Perez:**

That reserve can make you to feel relax. That book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) was bright colored and of course has pictures on there. As we know that book The Unified Neutral Theory of Biodiversity and Biogeography (MPB-32) (Monographs in Population Biology) has many kinds or type. Start from kids until teenagers. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best

book for you and try to like reading which.
