## Environmental Factors in Neurodevelopmental and Neurodegenerative Disorders

*Environmental Factors in Neurodevelopmental and Neurodegenerative Disorders* presents a state-of-the-art review of the effects of environmental contaminants on the development and degeneration of the human nervous system, brought together by world-leading experts in the field.

Part One describes the adverse effects that the environment can have on neurological development, and how these effects may exhibit. Specific contaminants and their possible consequences of exposure are addressed (lead, methylmercury, alcohol), as well as specific disorders and the environmental factors associated with them, such as the effect of diet on attention deficit and hyperactivity disorders. Part Two tackles neurodegenerative disorders, specifically addressing their potential neurotoxic origins, and discussing the increasing interest in the effects that early exposure may have in later life.

*Environmental Factors in Neurodevelopmental and Neurodegenerative Disorders* is an invaluable reference for those professionals working in the fields of toxicology, environmental health and neuroscience.

- Provides, for the first time, the cutting-edge theory of environmental impacts on both neurodegenerative and neurodevelopmental disorders
- Written by an international selection of the world's foremost experts in the field of neurotoxicology
- Full-colour throughout, providing accurate and illustrative examples of neurotoxic effects in action
- An invaluable reference for those professionals working in the fields of toxicology, environmental health, and neuroscience
