In the treatment of otosclerosis, it is crucial that surgeons be in full command of the many nuances involved in this extraordinarily challenging surgery. Authors Chris de Souza, Marcos V. Goyocoolea, and Neil M. Sperling have written a comprehensive text, *Otosclerosis: Diagnosis, Evaluation, Pathology, Surgical Techniques, and Outcomes*, for otologic surgeons seeking to provide treatment with the most current surgical techniques. As a guide to performing stapedectomies, this book is a concise and practical aid paired with an invaluable atlas developed by internationally acknowledged experts. These full-color photos and illustrations are effective learning tools for ensuring the best surgical results. Furthermore, the experience and techniques offered by these experts have been gleaned through years of success performing this demanding procedure.

The accompanying DVD includes videos that demonstrate a step-by-step approach to performing stapedectomy procedures.
