**Spatial Analysis: Statistics, Visualization, and Computational Methods** Tonny J. Oyana, Florence Margai

An introductory text for the next generation of geospatial analysts and data scientists, **Spatial Analysis: Statistics, Visualization, and Computational Methods** focuses on the fundamentals of spatial analysis using traditional, contemporary, and computational methods. Outlining both non-spatial and spatial statistical concepts, the authors present practical applications of geospatial data tools, techniques, and strategies in geographic studies. They offer a problem-based learning (PBL) approach to spatial analysis?containing hands-on problem-sets that can be worked out in MS Excel or ArcGIS?as well as detailed illustrations and numerous case studies.

The book enables readers to:

- Identify types and characterize non-spatial and spatial data
- Demonstrate their competence to explore, visualize, summarize, analyze, optimize, and clearly present statistical data and results
- Construct testable hypotheses that require inferential statistical analysis
- Process spatial data, extract explanatory variables, conduct statistical tests, and explain results
- Understand and interpret spatial data summaries and statistical tests

Spatial Analysis: Statistics, Visualization, and Computational Methods incorporates traditional statistical methods, spatial statistics, visualization, and computational methods and algorithms to provide a concept-based problem-solving learning approach to mastering practical spatial analysis. Topics covered include: spatial descriptive methods, hypothesis testing, spatial regression, hot spot analysis, geostatistics, spatial modeling, and data science.

### **From reader reviews:**

#### **Raul Joyner:**

Hey guys, do you wish to find a new book to learn? Maybe the book with the title Spatial Analysis: Statistics, Visualization, and Computational Methods suitable to you? The particular book was written by a well-known writer in this era. Often the book titled Spatial Analysis: Statistics, Visualization, and Computational Methods is a single of several books that everyone reads now. This kind of book was inspired a number of people in the world. When you read this book you will enter the new age that you ever know ahead of. The author explained their strategy in a simple way, therefore all of people can easily be aware of the core of this guide. This book will give you a large amount of information about this world now. In order to see the representation of the world within this book.

#### **Arthur Pascual:**

Often the book Spatial Analysis: Statistics, Visualization, and Computational Methods will bring one to the new experience of reading the book. The author's style to spell out the idea is very unique. Should you try to find a new book to see, this book is very acceptable to you. The book Spatial Analysis: Statistics, Visualization, and Computational Methods is much recommended to you to study. You can also get the e-book through the official web site, so you can easily read the book.

#### **Ellen Kelsey:**

This Spatial Analysis: Statistics, Visualization, and Computational Methods is a new way for you who has intense curiosity to look for some information given it relieves your hunger for details. Getting deeper you on it, getting knowledge more you know or perhaps you who still have a little bit of digest in reading this Spatial Analysis: Statistics, Visualization, and Computational Methods can be the light food for yourself because the information inside this particular book is easy to get simply by anyone. These books create themselves in the form and that is reachable by anyone, sure I mean in the e-book web form. People who think that in book form make them feel tired even dizzy, this book is the answer. So there is no in reading a book especially this one. You can find what you are actually looking for. It should be here for you. So, don't miss this! Just read this e-book style for your better life as well as knowledge.

#### **Haydee Todd:**

Reading a publication makes you to get more knowledge as a result. You can take knowledge and information from your book. A book is prepared or printed or created from each source which is filled with updates of news. In this modern era like currently, many ways to get information are available for you actually. From media social like newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the Spatial Analysis: Statistics, Visualization, and Computational Methods when you desired it?
