Marine Structural Design Calculations Mohamed El-Reedy

The perfect guide for veteran structural engineers or for engineers just entering the field of offshore design and construction, **Marine Structural Design Calculations** offers structural and geotechnical engineers a multitude of worked-out marine structural construction and design calculations. Each calculation is discussed in a concise, easy-to-understand manner that provides an authoritative guide for selecting the right formula and solving even the most difficult design calculation.

Calculation methods for all areas of marine structural design and construction are presented and practical solutions are provided. Theories, principles, and practices are summarized. The concentration focuses on formula selection and problem solving. A “quick look up guide”, **Marine Structural Design Calculations** includes both fps and SI units and is divided into categories such as Project Management for Marine Structures; Marine Structures Loads and Strength; Marine Structure Platform Design; and Geotechnical Data and Pile Design. The calculations are based on industry code and standards like American Society of Civil Engineers and American Society of Mechanical Engineers, as well as institutions like the American Petroleum Institute and the US Coast Guard. Case studies and worked examples are included throughout the book.

- Calculations are based on industry code and standards such as American Society of Civil Engineers and American Society of Mechanical Engineers
- Complete chapter on modeling using SACS software and PDMS software
- Includes over 300 marine structural construction and design calculations
- Worked-out examples and case studies are provided throughout the book
- Includes a number of checklists, design schematics and data tables

From reader reviews:

Patricia Vasquez:

The book Marine Structural Design Calculations can give more knowledge and also the precise product information about everything you want. Why must we leave a good thing like a book Marine Structural Design Calculations? Wide variety you have a different opinion about book. But one aim this book can give many data for us. It is absolutely proper. Right now, try to closer along with your book. Knowledge or details that you take for that, you may give for each other; you could share all of these. Book Marine Structural Design Calculations has simple shape but the truth is know: it has great and big function for you. You can seem the enormous world by open and read a book. So it is very wonderful.

Beverly Dyar:

Do you really one of the book lovers? If so, do you ever feeling doubt when you are in the book store? Aim to pick one book that you find out the inside because don't ascertain book by its protect may doesn't work at this point is difficult job because you are afraid that the inside maybe not as fantastic as in the outside seem likes. Maybe you answer is usually Marine Structural Design Calculations why because the wonderful cover that make you consider about the content will not disappoint you actually. The inside or content is fantastic as the outside or maybe cover. Your reading 6th sense will directly assist you to pick up this book.

Rita Kirby:

You can obtain this Marine Structural Design Calculations by go to the bookstore or Mall. Merely viewing or reviewing it could to be your solve difficulty if you get difficulties for your knowledge. Kinds of this reserve are various. Not only by written or printed but can you enjoy this book simply by e-book. In the modern era just like now, you just looking because of your mobile phone and searching what their problem. Right now, choose your personal ways to get more information about your e-book. It is most important to arrange you to ultimately make your knowledge are still revise. Let's try to choose proper ways for you.

John Keys:

As a scholar exactly feel bored to be able to reading. If their teacher questioned them to go to the library as well as to make summary for some e-book, they are complained. Just little students that has reading's heart and soul or real their interest. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. Therefore , this Marine Structural Design Calculations can make you sense more interested to read.
