Communication System Security (Chapman & Hall/CRC Cryptography and Network Security Series)
Lidong Chen, Guang Gong

Helping current and future system designers take a more productive approach in the field, **Communication System Security** shows how to apply security principles to state-of-the-art communication systems. The authors use previous design failures and security flaws to explain common pitfalls in security design.

Divided into four parts, the book begins with the necessary background on practical cryptography primitives. This part describes pseudorandom sequence generators, stream and block ciphers, hash functions, and public-key cryptographic algorithms.

The second part covers security infrastructure support and the main subroutine designs for establishing protected communications. The authors illustrate design principles through network security protocols, including transport layer security (TLS), Internet security protocols (IPsec), the secure shell (SSH), and cellular solutions.

Taking an evolutionary approach to security in today's telecommunication networks, the third part discusses general access authentication protocols, the protocols used for UMTS/LTE, the protocols specified in IETF, and the wireless-specific protection mechanisms for the air link of UMTS/LTE and IEEE 802.11. It also covers key establishment and authentication in broadcast and multicast scenarios.

Moving on to system security, the last part introduces the principles and practice of a trusted platform for communication devices. The authors detail physical-layer security as well as spread-spectrum techniques for anti-jamming attacks.

With much of the material used by the authors in their courses and drawn from their industry experiences, this book is appropriate for a wide audience, from engineering, computer science, and mathematics students to engineers, designers, and computer scientists. Illustrating security principles with existing protocols, the text helps readers understand the principles and practice of security analysis.

From reader reviews:

Karen Partain:

Reading a book tends to be new life style in this era globalization. With examining you can get a lot of information which will give you benefit in your life. Using book everyone in this world could share their idea. Guides can also inspire a lot of people. Plenty of author can inspire all their reader with their story or maybe their experience. Not only the story that share in the guides. But also they write about the information about something that you need case in point. How to get the good score toefl, or how to teach children, there are many kinds of book that exist now. The authors on this planet always try to improve their ability in writing, they also doing some study before they write for their book. One of them is this Communication System Security (Chapman & Hall/CRC Cryptography and Network Security Series).

Mary Richards:

People live in this new morning of lifestyle always aim to and must have the spare time or they will get lot of stress from both lifestyle and work. So , if we ask do people have time, we will say absolutely indeed. People is human not a robot. Then we consult again, what kind of activity are there when the spare time coming to an individual of course your answer will probably unlimited right. Then ever try this one, reading books. It can be your alternative with spending your spare time, the book you have read will be Communication System Security (Chapman & Hall/CRC Cryptography and Network Security Series).

Miriam Ellis:

You could spend your free time to read this book this publication. This Communication System Security (Chapman & Hall/CRC Cryptography and Network Security Series) is simple to bring you can read it in the park your car, in the beach, train and soon. If you did not possess much space to bring the actual printed book, you can buy the e-book. It is make you much easier to read it. You can save often the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.

Ryan Strausbaugh:

Reading a publication make you to get more knowledge from the jawhorse. You can take knowledge and information from a book. Book is prepared or printed or created from each source which filled update of news. In this modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science reserve, encyclopedia, reference book, book and comic. You can add your understanding by that book. Do you want to spend your spare time to spread out your book? Or just seeking the Communication System Security (Chapman & Hall/CRC Cryptography and Network Security Series) when you essential it?
